DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. **Claims 1-13, 23-38** drawn to a WLAN interactive device utilizing physical layer receivers, and classifiers indicating confidence levels, classified in class 370, subclass 338 and class 455 subclass 552.1.

II. **Claims 14-22 and 39-46** drawn to DSSS/CCK (Direct Sequence Spread Spectrum with Complementary Code keying) receiver utilizing features of OFDM (Orthogonal Frequency Division Multiplexing) utilizing concepts of orthogonality spread spectrum coding, classified in class 370 subclass 516 and class 375, subclass 130.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a probing unit for managing probing signals, while invention I has transition control unit for managing transitional signals. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Shayne Short March 27, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2617

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
